- Repairs performed by Local Moped and Scooter Dealers.
- Repair parts are available through Dealer network.
- Repair Manuals & Parts Lists available upon request.
- Customized Adaptations and Engineering Designs provided by Mobility Technologies, LLC.
- Limited Warranty

OUR STORY

In March of 2008 my wife and I were vacationing with some friends in Key West Florida. As many may know who have been to Key West you will generally find that walking almost anywhere in the town is possible. On one sunny day during our stay we decided to take a walk from our hotel to a place on one of the main streets for some breakfast.

While walking along one of the narrow sidewalks toward our destination we noticed a gentleman about a half a block ahead of us who was in a power wheelchair trying to negotiate his way around some trash cans that had been placed too far out on the sidewalk. Well the next thing to happen was not a good thing. He dropped one of his wheels off of the curb and toppled over into the street. A horrifying sight to say the least. We rushed up to help him up off of the ground and get him on his way. Fortunately he was uninjured but I realized at that moment that this incident could have turned out much worse.

As we returned home on the plane I couldn't get the image out of my head of how vulnerable the person was on that day. Clearly he needed a safer way to travel.

I began to think about the scooters that we rented to sightsee the day after the accident and it occurred to me that if somehow you could marry the liberating sense of freedom a scooter offers with the limits of a wheelchair then that person could be off of the sidewalk and on the street where he wants to be in the first place.

In fact, after I returned home I began to notice things about power chairs that I had previously not noticed; the dangers and frustrations of trying to navigate busy city streets. This was worse I thought than what I saw in Key West. Something had to be done about this. I shared my story with my brother, George Mosey, who was equally disturbed. Through a collaborative effort, the **LifeTrike** was born!

~ Steve Mosey, President

“LifeTrike strikes the right balance between comfort and safety to provide riders a thrilling and enjoyable experience. Extend the capability and range of your power chair or wheelchair to enhance your lifestyle by choosing when and where you'll travel. The LifeTrike offers an increased level of personal freedom, and is the only affordable, limited mobility product on the market today.”

Made in the USA.

This innovative vehicle changes lives!

FREQUENTLY ASKED QUESTIONS

How do I buy the **LifeTrike**?

Visit our website for the Dealer in your area, or call us direct at (765) 983-8711.

How can I get financial assistance?

Check with your Dealer for financing options and promotional discounts.

How do I get my **LifeTrike** fixed?

All local moped and scooter Dealers can repair your vehicle. Our technicians are available to offer Factory Support when necessary. Custom engineered repair parts are stocked and shipped from our Richmond, IN manufacturing facility.

Is my **LifeTrike** street legal?

Yes. All **LifeTrikes** come with factory-equipped lights, turn signals, horn, and brake lights to comply with all municipal enforcement requirements and regulations. Most states require some form of registration or licensing.
